

VOICE OF THE EDITOR

Where Are the Pole Dancing Accountants?

It's May Day. What does that mean? I have no urge to mention the political affiliations with this day because those conversations are boring. I'm more interested in the "popular and often raucous celebrations," [according to Wikipedia](#) that include dancing, singing, cake, etc. Really I should leave these nuggets to Richard, who is a much buffy-ier history buff than I.

Speaking of history, I have little doubt that the prolific Larry Perry could write many chapters in the definitive history to accounting and auditing. We published his [latest post on special purpose frameworks](#) this morning and his third [webinar on nonprofits](#) is this afternoon at 2 pm.

Check out both for a raucous May Day.
